

# ECHO Metadata Model

- ◆ This model originated from our experience in the ECHO project (European Chronicle On-line)
  - ECHO is an EC funded IST project
  - ECHO aims at providing
    - remote access to collection of historical documentary audio-video resources
    - a software infrastructure to support digital video archives
    - an extensible and interoperable architecture

## ECHO

## The approach

### Extends the IFLA-FRBR model

Four entities used to describe different aspect of a resource:

- ➔ **WORK**  
Describes a distinct intellectual or artistic creation  
*We do not script if we realize a book or a film or a*  
*Intellectual or artistic realisation of a work in*  
*charactaristic notation such as numeric, musical, or*  
*Physical embodiment of an expression*
- ➔ **EXPRESSION**  
*We do not script if we realize a book or a film or a*  
*Intellectual or artistic realisation of a work in*  
*charactaristic notation sound image etc.*
- ➔ **MANIFESTATION**  
*A single exemplar of a manifestation*  
*A documentary on the terrorist attack*
- ➔ **ITEM**  
*A single exemplar of a manifestation*  
*A documentary on the terrorist attack*  
*Interviews on the terrorist attack*

### Work e sue varianti

- Versioni
  - Negativo fotografico
  - Copie del negativo
  - Stampe fatte dal negativo
  - Versione digitalizzata del negativo
  - Copie su CD
  - Versione su sito web

Metadati

## Modello IFLA

## Modello IFLA

**Work** Idea astratta di un'opera, per es.,

- *L'Iliade, 2001 Odissea nello spazio*
- Il sito web del dipartimento di lettere
- La quinta sinfonia di Beethoven
- ecc.

## Modello IFLA

**Manifestation.** Una expression può essere fornita in una o più manifestations, per es.

- Il testo dell'Iliade è stato fornito in numerosi manoscritti e libri a stampa
- Un'opera musicale può essere distribuita su CD, oppure trasmessa per radio o per televisione

**Expression** Un work si realizza attraverso un'espressione, per es.

- L'*Iliade* ha espressioni orali, espressioni scritte, filmati, ecc.
- *2001 odissea nello spazio* ha una versione scritta in formato libro, una versione scritta in formato sceneggiatura, una versione filmata, ecc.
- Un'opera musicale ha lo spartito e le esecuzioni
- Il software ha il codice sorgente e l'eseguibile
- Vi sono molti work che hanno una singola espressione.

## Modello IFLA

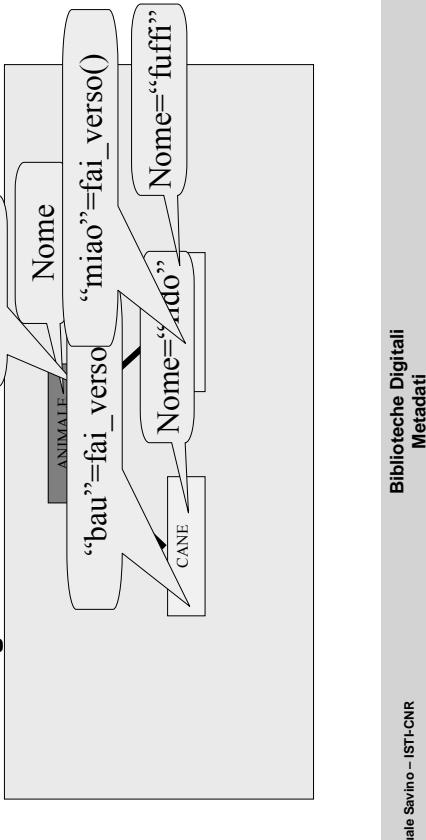

**Item.** Quando si hanno diverse copie di una manifestation, ognuna di esse è un item separato, per es.

- Una specifica copia del libro
- Una specifica rappresentazione dell'opera musicale
- Uno specifico CD
- Ecc.

## Ereditarietà: Relazioni di tipo “is a”

- ◆ definiscono una relazione di specializzazione di una classe più generale

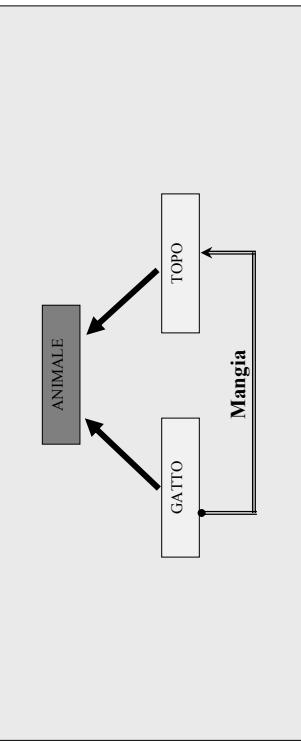

- ◆ Tutti gli attributi e i metodi vengono ereditati dalla classe figlia

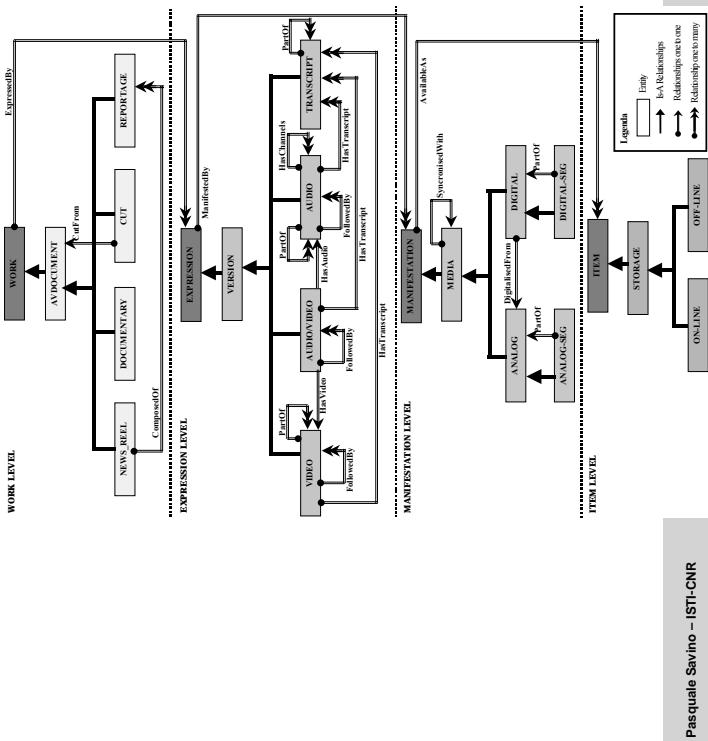

10

## Altre relazioni (cont.)

- ◆ es.: “composed of”

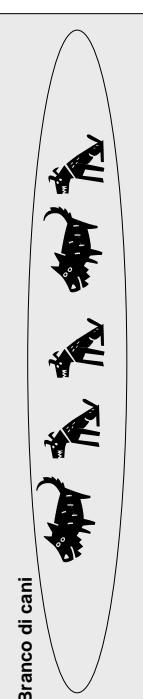

11

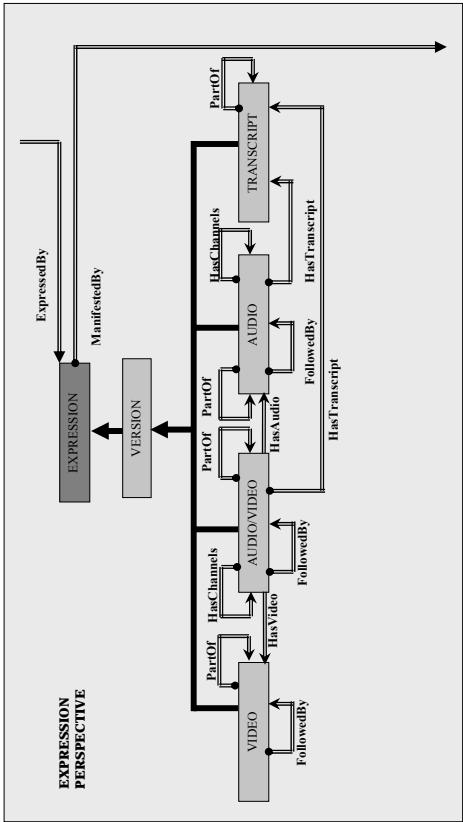

9

Biblioteche Digitali  
Metadati 14

## Running example

### ◆ Newsreel about the “Landing of the Allied Forces to Normandy”

- It is composed of several reportages
- There are several national versions
  - e.g. Italian and French
- Each version is available on different supports
  - e.g. VHS tapes, **MPEG files**
- There are several copies of the VHS tape with different preservation quality
- There are several copies of the MPEG file with different access speed

00000000.0002-2916(0002-2916) 1300 Bergkinder... In 's, wo die Trümmer aus der Lawinenmacht freiliegen, schmückten frische Kränze die Gräber der Vereschüttenen; aber in manchen der sommerhaften Häuser waren in den ersten Morgenstunden siehvolles Pickeln und Vorgespielten. Überlegend ist eine Marmorskulptur in die Kammer, wo die Tonale für Uhren hängen; durchgängige Hände bereiteten zu. Rückstücke wurden prahl gestellt; freudig vier Schulkindern hatten 1300 Bergkinder in die große Stadt am See gebracht. Und während wir dem Abschied der Wasserkinder zusehen, wöhnen aus anderen Bergländern, großkunstlichen und geschissischen, Handwerken von Kirchen im Jura oder La Brevine.

### Operazione completa

The screenshot shows the Microsoft Internet Explorer browser displaying the Echo Prototype 3 Web Service. The main content area shows a table of search results with columns for 'Value:' and 'Details'. The 'Value:' column contains items like 'AND OR In file', 'In file', 'in file', etc. The 'Details' column contains links such as 'in filecode', 'in copyright', 'in content', 'in description', 'in file', 'in filelist', 'in positioninfo', 'In PositionInfo', 'In TechnicalInfo', and 'In TechnicalInfo'. A 'Submit' button is located at the top right of the table.

A sidebar titled 'Field choice' is visible on the right side of the screen. It contains a large bold title 'Field choice' and a 'Video Segmentation' section with a dropdown menu showing options like 'Collegamento', 'Val', and 'Al'. Below this is a grid of icons representing different file types and media formats.

# Informatica Umanistica

The screenshot shows a Microsoft Internet Explorer window displaying the Echo prototype 3 Web Service. The URL is [http://\[loc-eucco-8081\]/MediaArchive/echoedStartView](http://[loc-eucco-8081]/MediaArchive/echoedStartView). The page title is "Echo prototype 3 Web Service - Microsoft Internet Explorer". The main content area displays a search result for "youth culture in Europe". The results are listed in a table:

Gene	Value
Theme	Subculture
Subtheme	Industrial
Keywords	1. First War 2. The World Wars 3. Sports in the 20th Century 4. Daily Life 5. > Youth Culture in Europe

Below the table, there is a "Submit" button. The top navigation bar includes links for "File", "Browsing", "Metadata Editor", "Import", "Delete", "Export", "Search", "Help", "Visualizza", "Prefetti", "Genna", "Multimedia", "PageRank", "Cerca nel sito", "Info sulla pagina", "Su", "Evidenza", "Video Segmentation", and "Collegamenti". The left sidebar has buttons for "Browsing", "Metadata Editor", "Import", "Delete", "Export", "Search", and "Help". The top right corner shows the "Intranet locale" icon.

The screenshot shows a Microsoft Internet Explorer window with the following details:

- Title Bar:** Echo prototype 3 - Web Services - Microsoft Internet Explorer
- Address Bar:** http://pre-edeno-1881/MediaArchive/element/startView
- Toolbar:** Includes Back, Forward, Stop, Refresh, Home, Favorites, Help, and a toolbar icon for "Multimedia".
- Form Fields:**
  - Genre: not specified
  - Theme: 1 - Post War
  - Subtheme: 1.1 - Back War - European Communications
  - Keywords:
    - Marshall plan
    - France and Europe
    - Industrial Europe
    - Central and Eastern Europe
    - European policies
    - Transport, Communications, Infrastructure
    - Raw materials
    - Energy sources
    - Industry
    - Agriculture, Farming
    - Reconstruction in Europe
    - European organisations (ECA)
- Buttons:** Go, Go >, Stop, Refresh, Back, Forward, Submit.
- Right Panel:** A sidebar titled "Video Segmentation" with a dropdown menu showing "Video Segmentation". It includes a "Search" input field and several small video thumbnail preview images.
- Bottom Status Bar:** Shows the URL "http://pre-edeno-1881/MediaArchive/element/startView" and the word "Home".
- Top Right:** The Microsoft Internet Explorer logo and a "Help" icon.

Collegamenti:

The screenshot shows the ECHO Prototype Web Service interface. The search term 'Cercare il web' has been entered into the search bar. Below the search bar, there are two tabs: 'Browsing' and 'Headless Editor'. Under the 'Browsing' tab, there are three buttons: 'Find icon', 'as of unlimited', and 'in active'. To the right of these buttons, there is a dropdown menu set to 'show [100]' which also includes options for 'sorted by Relevance' and 'in ascending' order. Below this, the number 'Hits: 19' is displayed. The main content area displays a list of 19 search results, each consisting of a small thumbnail image, a title, and a snippet of text. At the bottom of the page, there is a footer with several links: 'Berechtigungen', 'Berichterstattung', 'Internationale Modellausstellung', 'NFS DOC Bleiweissle', 'FH-Chasso, Tl. Lehrammchen Zürcher Stadtkantonalen', 'Arbeitsweise und Arbeitszeitraum', and 'Operazione completa'.

The screenshot shows the ECHONET software interface with the following components:

- Top Bar:** Includes icons for file operations (New, Open, Save, Print, etc.) and a search bar.
- Left Sidebar:** Contains sections for "Evidences" (with a list of items), "Case" (with a list of items), and "Segmentation".
- Central Area:** A large box labeled "Video Segmentation" contains a diagram of a document structure.
  - AV-Document:** The root node, represented by a blue rectangle.
  - Version:** A child node of AV-Document, represented by a grey rectangle.
  - Media:** A child node of AV-Document, represented by a grey rectangle.
  - Storage:** A child node of AV-Document, represented by a grey rectangle.
  - Video:** A child node of Media, represented by a blue rectangle.
  - Audio:** A child node of Media, represented by a blue rectangle.
  - Transcript:** A child node of Media, represented by a blue rectangle.
- Bottom Status Bar:** Shows the status "Internet locale" and other system information.

The screenshot shows the ECHO Prototype - Web Service interface. The top navigation bar includes links for 'File', 'Media', 'Sistema', 'Prefetti', 'Stile', 'Indirizzi', 'Cerca', 'Prefetti', 'Help', and 'Logout'. Below the navigation is a URL bar with the address 'http://pc-e09c0-8081/MediaActivitesService/DefaultView'. The main content area has a search bar with the placeholder 'Go...'. To the right of the search bar are buttons for 'Browsing', 'Media Editor', 'Import', and 'Export'. A large search result table is displayed, with the first row showing a link to 'Cerca nel Web'. The table has columns for 'Title', 'Author', 'Type', 'Date', and 'Delete'. A 'Submit' button is located at the top right of the table. On the left side, there is a sidebar with a 'Find [term]' input field and dropdown menus for 'as of' (set to 'Unfinished'), 'in' (set to 'archive'), 'sorted by' (set to 'Relevance'), and 'order' (set to 'ascending'). The results table shows one item with the title 'Hts 19'. The bottom of the page features a footer with links for 'Bestanden öffnen', 'Internationale Modellausstellung', 'NES DOC Bestekasse', and 'ECh Classo. Tl. Italienisches Zollamt-Stück bzgl. Güterverkehrsbehörde'.

The diagram illustrates the architecture of the EC-10 system. It starts with an 'Input' block at the bottom left, which feeds into a 'Segmentation' block. The 'Segmentation' block has three outputs: 'Video', 'Audio', and 'Transcript'. These three outputs are combined into a single 'Output' block at the bottom right. A large curved arrow on the right side of the diagram points from the 'Input' block towards the 'Output' block, indicating the overall flow of the system.

1300 Bergkinder...  
 ...der zurückweichende Schnee der Leinenmutter reicht.  
 schimmenische Wärme die Gräber der Verschütteten; aber in manchen der sonnenbauenen Häuser war in den ersten Maiböben ein fraudiges, eilen-voles Packen und Vodden, überstiegend in die Kammer, wo die Kinde für Jahre hängen: türsorgliche Hände bereiteten, aus anderen Berden, Fasenproviant zu. Rucksäcke wurden prall gefüllt treudig war der Abschied. Die Zürcher Schulkinder hatten 300 Bergkinder in die grosse Stadt am See geladen. Und während wir dem Abschied der Valsenkinder zusahen, während aus anderen Berden, gräubündischen und tessinischen, Hunderte von Kindern erwartungstön abkeisen, stießen in Juradon Ls Brexne

## Unassigned and Assigned fields

Some type of metadata fields do not have null values:

- ◆ Boolean (true/false)
- ◆ Date
- ◆ Closed Lists

Pasquale Savino – ISTI-CNR      118

## Browse the Expression

- ◆ Create
  - move the cursor of the slider and place it at the start time of the shot you want to create, push the button "I". The timecode and a small line on the timeline start blinking. Move the cursor and place it at the end time of the new segment, push again the button "I".
  - Push the button "I-H". A dialog box will allow you to select the start/end timecodes boundaries of the new segment.

## Create, update and delete

- ◆ Create
  - move the cursor of the slider and place it at the start time of the shot you want to create, push the button "I". The timecode and a small line on the timeline start blinking. Move the cursor and place it at the end time of the new segment, push again the button "I".
  - Push the button "I-H". A dialog box will allow you to select the start/end timecodes boundaries of the new segment.

## Create, update and delete (2)

- ◆ Modify
  - Push the button “>” (“<”). This will change the end (begin) of the selected segment to the begin (end) to the (preceding) succeeding segment.
  - Push the button “<>”. A dialog box will allow modifying the start/end timecodes boundaries of the selected segment.
  - By selecting the segments by means of the mouse button and pressing shift button, it is possible to select more than one segment. The selected segments are highlighted by means of a thicker line on the sliding bar, and their keyframes are contained in a coloured frame. By pushing the button “-+” all the segmented will be merged together. Note that, the new merged segmented will hierarch the textual metadata of the selected segment that appeared in green.
- ◆ Delete
  - Select a segment and push the button “X” or the key “Del” of the keyboard.

## Updating the keyframes

- ◆ Clicking on the button “K” the keyframe of the current video is updated by the frame currently shown.

## Creating a new AVDocument

- ◆ In order to create a new AVDocument from scratch, click on the menu item File→New. A new AVDocument will be created. Proceed creating the other entities of the AVDocument.

## Cross Language features

- ◆ Some of the metadata fields of the root of the AVDocument are treated as Cross Language by the editor. The metadata fields involved are:
  - Themes
  - Subthemes
  - Thematic Keywords

## Regia Demo

### Regia Demo (cont.)

- ◆ Bibliographic structure browsing
- ◆ Add/Removing children to the tree
- ◆ Editing metadata (AVDocument ex.)
- ◆ Theme, Subtheme, etc. switching language
- ◆ Tips
  - ◆ Activate an “unassigned” field (ex. EventDate)

### VideoAnnEx Annotation Tool

- ◆ The *VideoAnnEx* annotation tool assists authors in the task of annotating video sequences with MPEG-7 metadata.
- ◆ Each shot in the video sequence can be annotated with static scene descriptions, key object descriptions, event descriptions, and other lexicon sets.
- ◆ The annotated descriptions are associated with each video shot and are stored as MPEG-7 descriptions in an output XML file.
- ◆ The annotation tool also allows customized lexicons to be created, saved, downloaded, and updated.

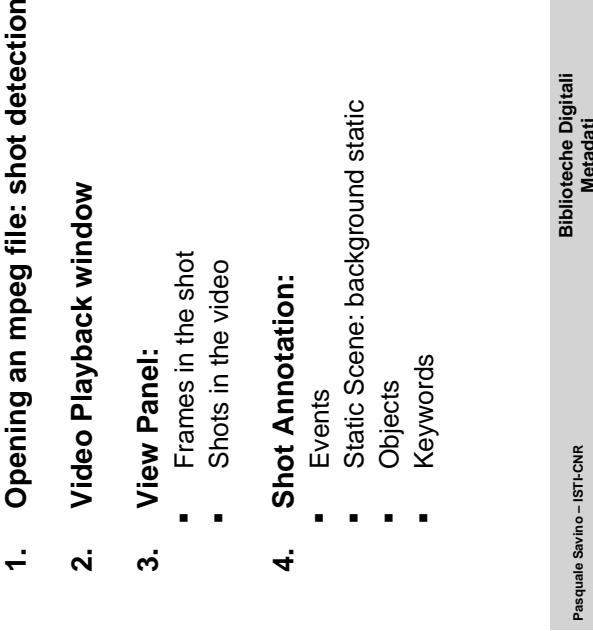

## Graphical User Interface

## DEMO

1. Opening an mpeg file: shot detection
2. Video Playback window
3. View Panel:
  - Frames in the shot
  - Shots in the video
4. Shot Annotation:
  - Events
  - Static Scene: background static Objects
  - Keywords

## DEMO

## Download site

- ◆ <http://www.research.ibm.com/VideoAnnEx/download.html>

## DEMO

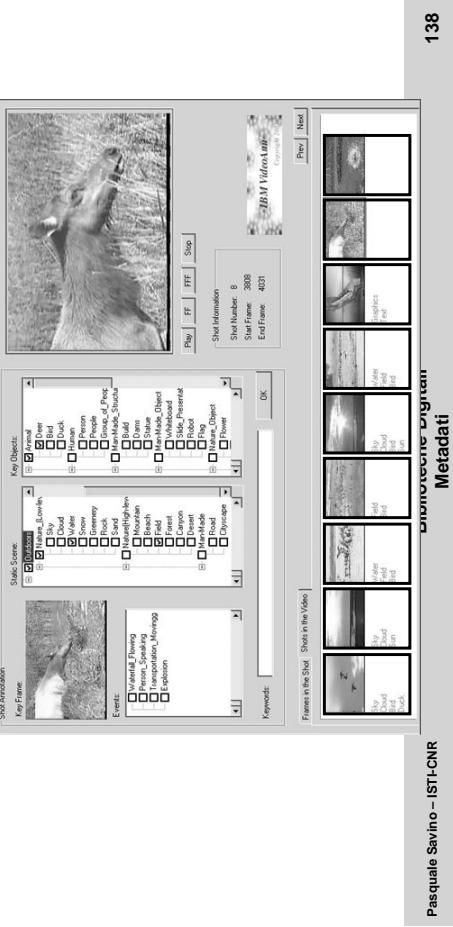

5. Region Annotation
6. Lexicon editing
7. Categories editing
8. Saving annotation
9. Saving lexicon
10. Saving shot keyframes
11. Load complete example
12. Generated xml files:
  - foo.mpeg
  - foo.mp7.xml
  - foo.lex.xml

# Informatica Umanistica

## Osservazioni

Università di Pisa

138

## Segments representation(2)

### ◆ Multi-dimensional (strata)

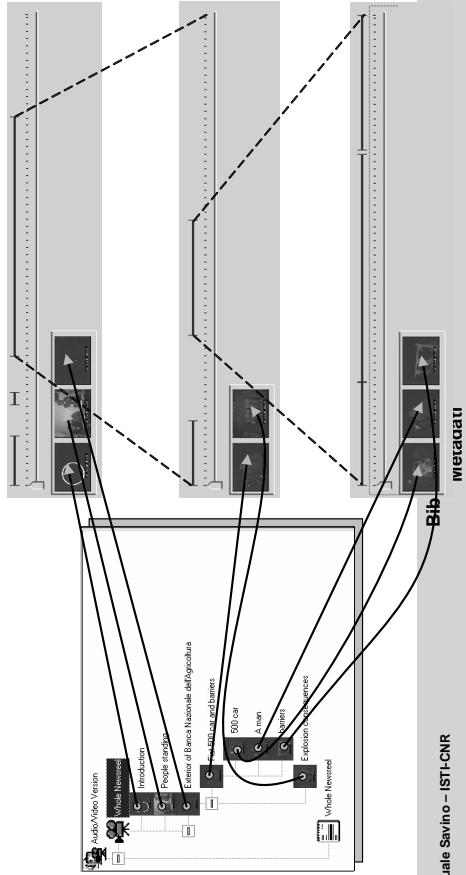

Pasquale Savino – ISTI-CNR

139

## Segments representation(3)

### ◆ Hierarchical

Biblioteche Digitali  
Metadati

Pasquale Savino – ISTI-CNR

## Segments representation

### ◆ Simple mono-dimensional

## Importance of the analysis tools

- ◆ More sophisticate software can aid the cataloguers during the editing phase:
  - Intelligent tool of cut detection, which do not produce masses of scenes (tunable: camera movement, fade, etc.)
  - Face and object detection tools are very useful
  - Audio analysis and speech recognition

## Usability

- ◆ In this talk we did not talk about the user interface usability
- ◆ However this issue is very important in audio/video metadata editing tools
- ◆ Silver editor of the Informedia project of the Carnegie Mellon University faces this problem
- ◆ This tool is more a video editing tool rather than a metadata editor, however the problem faced are similar

## Model or meta-model?

- ◆ Sometimes editing tools allow the user to modify the model
- ◆ IBM editor allows to modify the lexicon, or
  - ◆ the tecmath editor allows to add/remove strata
- ◆ There must be a separate tool for maintaining the metadata model
  - Confusion
  - Inconsistency, adaptation of other interface (eg., the retrieval interface)

## Silver tool user interface
