About this collection

Collezione di prova per la lezione

How to find information in the Prova collection

There are 3 ways to find information in this collection:

- search for particular words
- access publications by title
- access publications by filename

You can *search for particular words* that appear in the text from the "search" page. This is the first page that comes up when you begin, and can be reached from other pages by pressing the *search* button.

You can *access publications by title* by pressing the *titles a-z* button. This brings up a list of books in alphabetic order.

You can *access publications by filename* by pressing the *filenames* button. This brings up a list of entries, sorted by original filename.

Le Internet

Titoli in ordine alfabetico

The screenshot shows a Microsoft Internet Explorer browser window titled "Titles A-Z - Microsoft Internet Explorer". The address bar contains the URL "http://127.1.0.0/gsd?e=p-0-00-prova--00-0-0-0prompt-10---4-----0-1l--1-en-50---20-about---00031-". The website content includes a navigation menu with "HOME", "HELP", and "PREFERENCES" links. Below this is a large heading "titles a-z" and a sub-menu with "search", "titles a-z", and "filenames" options. The main content area is titled "Prova" and lists five items, each with a document icon and a title in italics:

- Lord of the Rings Fanatics Tour: Bilbo Baggins (*bilbo.html*)
- Lord of the Rings Frodo (*Frodo.html*)
- Lord of the Rings Merry (*merry.html*)
- Lord of the Rings Pippin (*pippin.html*)
- Lord of the Rings Sam (*sam.html*)

Bilbo Baggins

Full Name:	Bilbo Baggins
Date of Birth:	September 22, 2890 T.A.
Parents:	Bungo Baggins, Beladonna Took
Race:	Hobbit
Weapon:	Sting

(AUDIO: [Bilbo about Bag End](#))

"Well, I am Bilbo Baggins your Tour Guide and I will start by further introducing myself. I can still remember how my big adventure began. I was just sitting in my hobbit hole when Gandalf visited me. Before I knew it I was playing host for 13 dwarves and soon after I would begin an adventure that would take me half way across Middle-Earth to the lair of Smaug the Dragon. It was me who found the One Ring in the orc caverns where Gollum also lived at that time. I had to do a riddle game with Gollum which I eventually won by asking what I had in my pocket. I barely escaped all the adventures with the dwarves and I returned to the Shire carrying the One Ring with me as a treasure. It was many years later that I found out what the true nature was of the Ring and that was the beginning of the adventure my nephew Frodo had to undertake. After the War of the Ring I left middle-earth together with Frodo, Gandalf, Elrond and Galadriel."

In The Movie

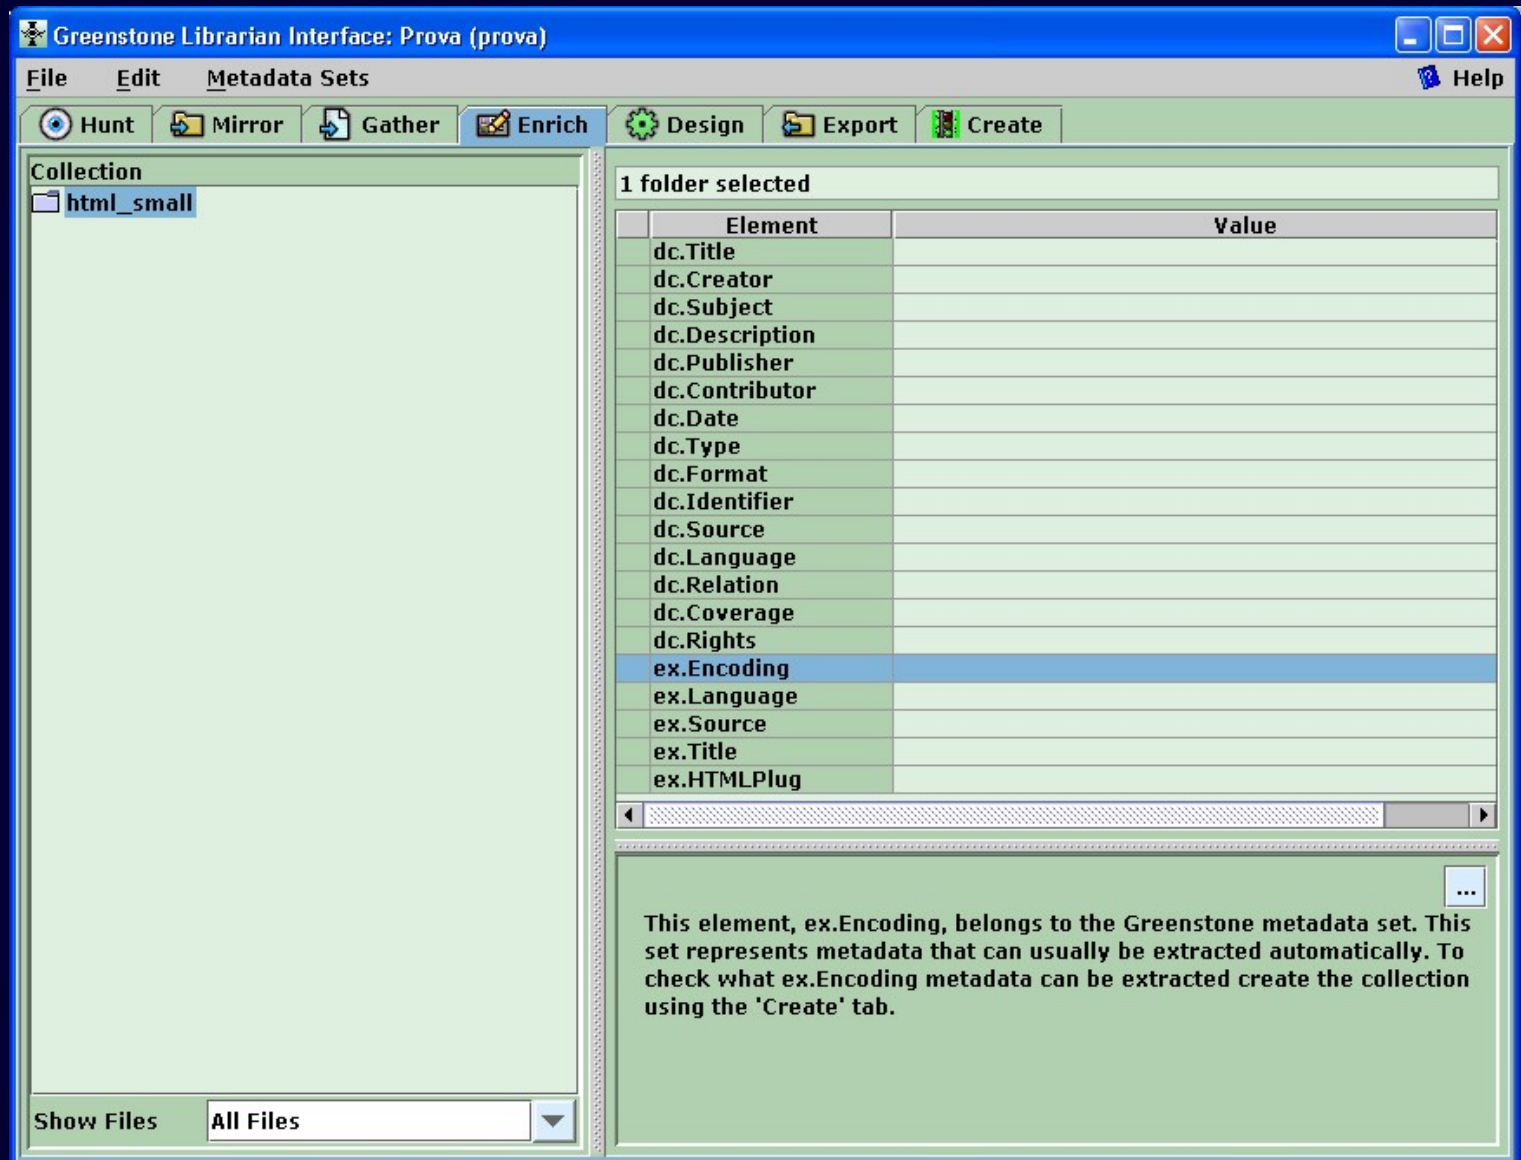

Ian Holm

Quote:
"Very well, very well, Master Elrond! said Bilbo suddenly. 'Say no more! It is plain enough what you are pointing at. Bilbo the silly Hobbit started this affair, and Bilbo had better finish it, or himself.'"

Il modulo per la creazione dei metadati

Matadati estratti automaticamente

The screenshot shows the Greenstone Librarian Interface (GLI) window titled "Greenstone Librarian Interface: Prova (prova)". The interface includes a menu bar (File, Edit, Metadata Sets, Help) and a toolbar with buttons for Hunt, Mirror, Gather, Enrich, Design, Export, and Create. On the left, a "Collection" tree shows a folder named "html_small" containing subfolders "bilbo_files", "Frodo_files", "merry_files", "pippin_files", and "sam_files". Under "bilbo_files", the file "bilbo.html" is selected. The main area displays "1 file selected" and a table of metadata elements and their values.

Element	Value
dc.Title	
dc.Creator	
dc.Subject	
dc.Description	
dc.Publisher	
dc.Contributor	
dc.Date	
dc.Type	
dc.Format	
dc.Identifier	
dc.Source	
dc.Language	
dc.Relation	
dc.Coverage	
dc.Rights	
ex.Encoding	iso_8859_1
ex.Language	en
ex.Source	bilbo.html
ex.Title	Lord of the Rings Fanatics Tour: Bilbo Baggins
ex.HTMLPlug	1

Below the table, a text box provides information: "This element, ex.Encoding, belongs to the Greenstone metadata set. This set represents metadata that can usually be extracted automatically. To check what ex.Encoding metadata can be extracted create the collection using the 'Create' tab."

At the bottom left, there is a "Show Files" button and a dropdown menu currently set to "All Files".

Metadati assegnati manualmente

The screenshot shows the Greenstone Librarian Interface (GLI) window titled "Greenstone Librarian Interface: Prova (prova)". The interface includes a menu bar (File, Edit, Metadata Sets, Help) and a toolbar with buttons for Hunt, Mirror, Gather, Enrich, Design, Export, and Create. On the left, a "Collection" tree shows folders for "bilbo_files", "Frodo_files", "merry_files", "pippin_files", and "sam_files", with sub-files like "bilbo.html", "Frodo.html", "merry.html", "pippin.html", and "sam.html". The main area displays "1 file selected" and a table of metadata for the selected file.

Element	Value
dc.Title	Biblo Baggins
dc.Creator	Greenstone example library
dc.Subject	Il signore degli anelli
dc.Description	
dc.Publisher	
dc.Contributor	
dc.Date	
dc.Type	
dc.Format	
dc.Identifier	
dc.Source	
dc.Language	
dc.Relation

dc.Rights	
ex.Encoding	iso_8859_1
ex.Language	en
ex.Source	bilbo.html
ex.Title	Lord of the Rings Fanatics Tour: Bilbo Baggins
ex.HTMLPlug	1

Below the table, there is a "Value" field containing "Il signore degli anelli" and three buttons: "Append", "Replace", and "Remove". Below these buttons is a section titled "All Previous Values" containing a list of "Il signore degli anelli". At the bottom left, there is a "Show Files" dropdown menu set to "All Files".

Esercitazione – Parte II

Creare una collezione usando la Greenstone Librarian Interface

Esercitazioni

- ◆ **Parte III – Creazione di una collezione di immagini**
- ◆ **Parte IV – Associare dei valori di metadati ai documenti**
- ◆ **Parte V – Modifica del logo della collezione**

Esercitazioni

- ◆ **Parte III – Creazione di una collezione di immagini**
 - Si utilizza il collector, in modo da poter utilizzare un file di configurazione (collect.cfg) esistente.
- ◆ **Parte IV – Associare dei valori di metadati ai documenti**
 - Si parte dalla collezione di immagini creata nella parte III
 - Si usa la Librarian Interface per inserire valori per i metadati Title, Creator e Description
 - Si associa un Title diverso ad ogni immagine, mentre si associa lo stesso Creator a tutte le immagini
 - Si modificano le modalità di visualizzazione dei metadati inseriti (funzione Format Feature)

Esercitazioni

◆ Parte IV (cont.)

- Si configura il plug-in che opera sulle immagini, in modo da generare dei thumbnail più piccoli
- Viene creato un indice di ricerca sulle “description”
- **Esercizio**
 - ➔ Analogamente a quanto fatto nell’esercitazione per Title, Creator e Description, si richiede di associare una data ad alcune immagini ed a creare un classificatore che visualizzi i documenti in base alla data
 - ➔ [Nel panel Design si deve selezionare la sezione Browsing Classifiers ed aggiungere un classificatore di tipo DateList per il metadato dc.Date]
 - ➔ Viene inoltre richiesto di creare un indice di ricerca sulla data

◆ Parte V – Modifica del logo della collezione
